

NEW

ECZEMA CLINICAL TRIAL

Ego Pharmaceuticals is testing a new cleanser and moisturiser that have been designed for use by those with moderate eczema.

If you are over 18 years of age and have moderate eczema that has been diagnosed by a doctor, you may be eligible to participate in this trial looking at the benefits to eczema prone skin of these newly designed products. You will be asked to use the new products every day for 4 weeks.

The trial is being conducted in Sydney and participants must be available to attend 6 free dermatologist consultations (mostly on Saturdays) at a clinic in Kogarah over a 5-week period. This trial is placebo-controlled, with half the participants receiving the active products, and half receiving the placebo products.

If you believe you are eligible please visit egopharm.com/clinical-trial

Should you have any questions about these requirements please contact Dennis from St George Dermatology on 02 9587 4277 between 10am and 3pm, Monday to Friday.
